

THE IMPORTANCE OF HEALTHY TEETH

In October, Whoopi Goldberg shared a message on the ABC television show “The View” that was eye opening. “Take care of your teeth. I’m embarrassed to say this to people. I have great dental insurance and I did nothing with it. For years and years, I let my mouth go and I am paying the price. I’m losing teeth because I’m losing bone. I brought this on myself because I could have prevented it. Your mouth is connected to your entire system, your immune system. If you do not take care of your mouth, you are not taking care of your body, and it will kill you!”

Like Whoopi, you have dental insurance that will cover your preventive visits. We know it’s easy to put off going to the dentist when it’s not obvious there is a problem. We also know that with our country’s economy, it’s easy to convince yourself to delay possible expenses. But your dental insurance will cover most or all of your preventive visit and by finding any problems early, correction of the problems will actually cost less and save you money, save you time in the dental chair, save your teeth...and save your life!

Keep your mouth healthy by giving us a call today!
